Experience

Web Development Immersive Fellow — 10/2018 – 01/2019
General Assembly
- Full-time 500+ hour immersive learning modern full-stack web development.
 Projects
  - **Tic-Tac-Toe:** A front-end game using javascript, jQuery, HTML, CSS, and bootstrap. Game history and user information is stored using a third party api.
  - **Rhodypedia:** This full-stack application allows users to submit details about lesser known state attractions. The database is deployed to Heroku and built using Rails.
  - **FileBucket:** A full-stack file management app for images. This team project used an agile approach. Images are stored to AWS with an Express API.
